PROFESSIONAL SUMMARY

As a Front-End Developer, I specialize in building responsive web applications with a strong focus on React, JavaScript, and user interface design. With hands-on experience in React and HTML5, I am adept at creating dynamic, high-performing user interfaces that are mobile-responsive and cross-browser compatible. I utilize CSS3 and CSS frameworks like Tailwind and Bootstrap to design clean, visually appealing layouts that enhance user experience. I am skilled in integrating RESTful APIs to ensure seamless data communication and optimizing web performance for faster load times. Passionate about writing clean, maintainable code, I collaborate effectively with cross-functional teams to deliver scalable solutions that align with both user and business needs. With a problem-solving mindset, I am committed to creating innovative, user-centered applications that contribute to business success.

PROFESSIONAL EXPERIENCE

Freelance Front-End Web Developer

UsenVoice TV - Edo, Nigeria

Oct 2024 - Nov 2024

- Designed and developed a responsive, scalable news station web application using React and CSS frameworks (Tailwind, Bootstrap), improving user engagement and accessibility.

- Enhanced user experience and increased news coverage by 40% by creating a user-friendly front-end with intuitive navigation and dynamic content display.
- Collaborated closely with the back-end team to integrate RESTful APIs, ensuring seamless data communication between the front-end and back-end, enhancing website functionality.
- Worked with UI/UX designers to deliver a visually appealing and interactive interface, optimizing usability and ensuring smooth performance across devices.
- Optimized website performance through responsive design, semantic tags, and API integration, ensuring fast load times and a consistent user experience.

Freelance Front-end Web developer

KUKEAT - Akure, Nigeria

October 2023 - January 2024

- Collaborated with UI/UX designers to deliver a user-friendly and scalable design that aligns with project requirements.
- Established a functional IT team structure and created a robust codebase, enabling seamless future operations and development.
- Designed and implemented front-end architecture that significantly improved the scalability and performance of the website.
- Developed a secure, interactive web application with a modern front-end framework and an intuitive user interface, enhancing usability.
- Contributed as a productive and positive team member, actively participating in designing, coding, and debugging operations to ensure project success.

Freelance Web developer

FOREMAJ - Ibadan, Nigeria

October 2023 - December 2023

- Built a responsive and dynamic website that improved the company's online presence, attracting both national and international customers.
- Developed the site using React, HTML, and CSS, ensuring a modern, interactive, and user-friendly experience.
- Collaborated closely with the UI/UX designer to create a clean, efficient, and scalable design, optimizing both user experience and front-end performance.

Freelance Full stack web developer

Arise Contractors Group - Texas, USA

May 2023 - November 2023

- Developed a responsive, single-page web application using React, HTML, CSS, and React Bootstrap, significantly improving user experience and accelerating feature development.
- Designed and implemented a modular front-end architecture, ensuring scalability and seamless integration with back-end services.

- Created a fully functional admin panel, allowing non-developers to easily update website sections such as the gallery, enhancing site maintainability.
- Integrated the Instagram API to provide real-time updates of the company's feed, increasing dynamic content engagement and user interaction.
- Boosted the company's online visibility by 30% through effective SEO strategies, enhancing search engine rankings and organic traffic.
- Collaborated closely with UI/UX designers to create user-centric and scalable design solutions, ensuring the application aligned with business goals and provided a seamless user experience.

Freelance Front-end web developer

Sinnot Technologies - Akure, Nigeria

July 2020 - August 2020

- Collaborated effectively as a key team member to design, develop, and debug website features, contributing to the timely and successful delivery of the project.
- Developed the company website using HTML, CSS, and Bootstrap, ensuring a responsive, visually appealing, and intuitive user interface.
- Proactively identified, diagnosed, and resolved website issues, including broken links, typographical errors, and formatting inconsistencies, enhancing overall site performance and user experience.
- Contributed to maintaining a consistent and cohesive visual design across the website by standardizing fonts, layouts, images, and formatting to ensure alignment with brand guidelines.
- Continuously evaluated and adopted new web development standards, technologies, and best practices to ensure the website remained current and optimized for performance.
